Full-Stack Developer with international experience, strong problem-solving skills, and a proactive mindset. Higher Vocational Training Degree in Software Development student, focused on continuous learning. I combine technical knowledge with strong communication and effective teamwork abilities.

## WORK EXPERIENCE

### Freelance

February 2023 – Present

#### Full Stack Developer

Remote

- Collaborating with clients to understand their business requirements, goals, and target audience, ensuring a clear understanding of project objectives.
- Designing and developing custom websites tailored to clients' specifications, incorporating modern design principles with React and improved user engagement and usability.
- Implementing SEO strategies to improve search ranking and organic visibility, delivering measurable value to client businesses.

### Modelty

January 2025 - September 2025

#### Full Stack Developer

Remote

Sole developer responsible for building a SaaS dashboard from the ground up using Next.js, Tailwind CSS, and PostgreSQL. Oversaw the entire development lifecycle, from architecture and implementation to deployment. Focused on delivering core features while strategizing the next steps for an efficient and timely launch.

### Kyvrox

January 2024 – Present

#### Backend Developer

Málaga, Spain

- Worked on a dashboard project that enables users to interact with an AI tool designed for cybersecurity purposes (details protected under NDA).
- Built a real-time Django dashboard, integrating a FastAPI WebSocket server for live data updates.
- Designed and managed PostgreSQL databases, optimizing indexes and queries while handling data queues to improve performance and scalability.

### Munia Salud

June 2023 – September 2023

#### Backend Internship

Remote

### Digital Market - HP Reseller

September 2019 – December 2022

#### IT & Data Integration Engineer

Málaga, Spain
